

Make in India at HAL - Import Substitution

- HAL has initiated several steps to adopt “Make in India” concept.
- Several strategies are being adopted at HAL for Indigenous development of Aircraft, Helicopters, Aero engines, UAVs, aircraft systems such as avionics, mechanical systems etc.
- HAL has established an Indigenisation department at corporate level to implement Indigenisation.
- Dedicated Indigenisation cells are set up at the divisional levels for Indigenisation of Items/LRUs which are imported from foreign OEMs.
- LRUs/ Items based on the criticality/ Obsolescence and non supply from OEMs are identified and taken up for Indigenisation.
- Every year more than 2000 items are indigenized with considerable FE Savings.
